

▣ **Company:**

Vancouver Convention & Exhibition Centre, British Columbia

▣ **Industry:**

Property Management

▣ **Challenge:**

To provide an effective cleaning and maintenance program that is safe for users and the environment that meet budgetary concerns

▣ **Solution:**

Avmor's EcoPure EP64, EP65, EP66, Avmor's Biomor HD Drain Maintainer, Deodorizer and Cleaner for Carpets and Fabrics & Odour Eliminator, Avmixx Dilution Control

Results:

- Customized training to optimize the usage of the products.
- Effective products that work and meet the budgetary concerns of the customer.

Surrounded by the mountains and located on the waterfront in beautiful downtown, the Vancouver Convention & Exhibition Centre's (VCEC) natural setting sets the stage for this pioneer and leader in environmental responsibility. VCEC maintains a rigorous program of recycling, food and beverage management, and energy conservation. The award-winning Convention Centre is currently undergoing a major expansion program that will triple the capacity of the current facility and pave the way for it to become one of the greenest convention centres in the world. A "living roof", seawater heating and cooling, on-site water treatment, and fish habitat are just some of the exciting new features of the expanded facility.

They are aiming for LEED (Leadership in Energy and Environmental Design) Gold Standard while incorporating an unprecedented range of flexible and functional spaces for meetings of any sizes.

Although VCEC has been using sustainable products for over 21 years, it made the switch to using Avmor's EcoPure and Biomor products. The Convention Centre was especially impressed with the ease of use, value, and superior performance of Avmor's products. In particular, Biomor managed to effectively remove many of the lingering tough odours that other products could not. The manager of housekeeping at VCEC observed: "Not only do the products work, they are price competitive. It meets my budgetary needs."

VCEC has also implemented Avmor's Avmixx Dilution control system, which provides added safety and control to the Convention Centre's cleaning staff. Avmixx prevents direct contact with cleaning products and provides accurate dilutions. Therefore, less product is wasted, resulting cost savings and better budget control. The Dilution Control System ensures that the cleaning products perform at their optimal level. All in all, VCEC was pleased with the excellent training, support and service provided by their Avmor representative. The transition to Avmor's products was seamless.

By seeking the best sustainable products and developing innovative green features as part of its continued commitment to the environment, Vancouver Convention & Exhibition Centre is not only the "World's Best Convention Centre", but also one of the greenest. VCEC's responsible business practices guarantee the outmost comfort and well-being of its visitors.

An Avmor Success Story

Vancouver Convention & Exhibition Centre [VCEC] goes GREEN with Avmor's EcoPure & Biomor
