## AVMOR'S AV-MIXX II DISPENSER

### RELIABLE DILUTION CONTROL SYSTEM FOR MULTIPLE CHEMICALS

Avmor has partnered with Hydro Systems to bring you the new and improved Av-Mixx™ II Wall-Mounted Dispenser. The Av-Mixx II offers a unique way to dispense a wide variety of automatically diluted solutions into spray bottles, buckets and other containers, while eliminating the possibility of chemical carryover between products.

Patented AccuPro® Pressure Regulation Technology eliminates dilution variance by controlling the amount of water permitted into the unit, never allowing it to "lean out" the desired dilution target.

- Its venting system allows users to have one closed loop chemical for both high and low fill rates out of the same bottle.
- The patented dual flow cartridge assembly prevents chemical contact and eliminates product carryover.
- The cam assembly provides simple, one-hand operation to engage and disengage the bottle - every time.
- It uses the same mounting pattern as the original Av-Mixx dispensers.
- It can be used with original Av-Mixx chemical bottles.
- The new unit has a shelf to prevent the bottle from separating from the seal.
- The same lever is now used to engage and disengage the bottle.
